

BELLUMBIT AIRDROP

JOIN OUR COMMUNITY AND GET FREE TOKENS

What is Airdrop and how does it work?

Airdrop is a cryptocurrency distribution method that allows users to receive free tokens from a Bellumbit ICO. It works by sending new tokens to cryptocurrency wallets. These new tokens are then automatically distributed to the user's Bellumbit wallet.

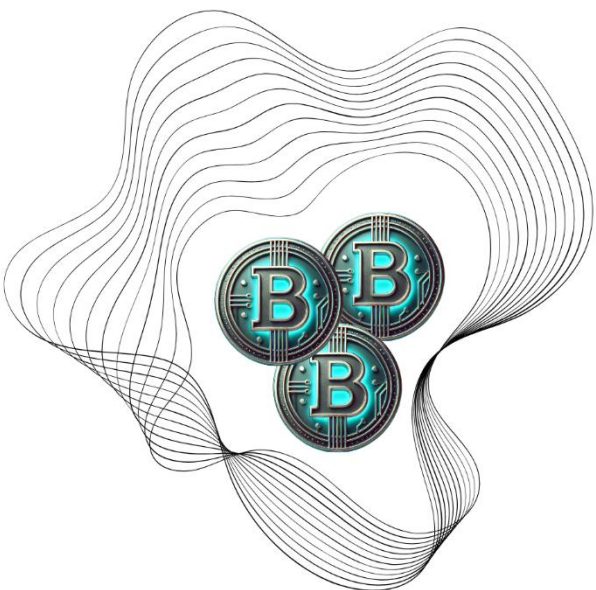

Holder Airdrop

In the holder airdrop, tokens are distributed to investors who hold 20,000 or more tokens (KYC required). Only certain amounts may be available during these events, so participating early is advantageous!

Premium Airdrop

If you're looking to get ahold of some extra Bellumbit Tokens, participating in the Premium Airdrop is a great way to do it. Every Sunday until the end of the ICO presale, anyone who holds at least 100,000 BLB Tokens will enter into a drawing to receive a significant airdrop of additional tokens. The more BLB Tokens you hold, the better your chances are of winning - so if you're looking to give yourself a boost, now's the time to start accumulating those tokens.

Referral Airdrop

Invite your friends and family to participate in our presale using your unique referral link, and you'll receive an additional 10% of their contribution in tokens. When someone uses your referral link to contribute, the bonus tokens will be automatically credited to your account. Additionally, the person who uses your link will also receive an extra 10% in tokens. It's a win-win opportunity for both of you!

How to Obtain Your Referral Link:

1. **Log into Your Bellumbit Wallet:** Begin by logging into your Bellumbit wallet.
2. **Navigate to Your Profile Page:** Once logged in, go to your profile page where you can find your referral link.
3. **Direct Access:** Alternatively, you can directly access your referral link through this link: [Bellumbit Referral Link](#).

Airdrops are dropped every Sunday.
